

**Trilogyice**  
advanced laser hair removal

## Power of 3

3D-Trilogyice provides comfortable and effective laser hair removal on all skin types with maximum effect at an affordable price.

3D-Trilogyice combines the proven benefits of three wavelengths, achieving maximum results and versatility when compared to single wavelength. This powerful combination of different penetration and absorption levels of wavelengths, combined with the speed of delivery, ensuring that you will be receiving one of the safest and most comprehensive hair removal solutions available.

There is no doubting the evidence proving the benefits in utilising three laser wavelengths in a single hand piece which simultaneously targets different tissue depths as well as anatomical structures within the hair follicle. With the combination of different penetration and absorption levels of these wavelengths, combined with the speed of delivery, you can be assured you will be receiving one of the safest and most comprehensive hair removal solutions today.

Triple wavelength delivery

### Benefits of Treatment

- ✓ Super fast treatment
- ✓ Precision application
- ✓ Safe and virtually painless
- ✓ Suitable for all skin types including tanned
- ✓ Affordable
- ✓ Unprecedented Results

*"3D-Trilogyice combines the proven benefits of 3 laser wavelengths achieving maximum results and versatility when compared to single wavelength alternatives."*

## The Science

3D-Trilogyce hair removal employs volumetric heating of the dermal tissue. This heat can alter the stem cell function of the hair. The fluence of each pulse is delivered at a low power and the pulses are delivered rapidly to collectively heat the dermal tissue and thermally injure the hair follicle.

The melanin content in the hair attracts the pulses to conduct the heat rising the temperature of the follicle above the temperature of the dermal tissue. Resulting in permanent hair reduction.

## What will I experience during treatment?

During treatment, the hand piece will be used in a gliding forwards and backwards motion over the skin. You may experience a warming sensation in addition to a slight pinkness to the skin. The treatment itself is virtually painless.

## FAQ's

### What is unique about the 3D-Trilogyce treatment?

There is no doubting the evidence proving the benefits in utilising three laser wavelengths in a single handpiece which simultaneously targets different tissue depths as well as anatomical structures within the hair follicle. With the combination of different penetration and absorption levels of these wavelengths, combined with the speed of delivery, you can be assured you will be providing one of the safest and most comprehensive hair reduction solutions today.

### Is 3D-Trilogyce safe?

3D-Trilogyce in motion protocol ensures safe, comfortable and effective hair removal on all skin types. The energy pulses of the trilogy in motion protocol, works by gradually heating the dermis and damaging hair follicles whilst avoiding injury to the surrounding tissue.

The Trilogy in motion protocol of moving the applicator over the treatment area quickly enables full coverage whilst the contact cooling system ensures virtually pain free and effective hair reduction.

### Who is a good candidate for the 3D-Trilogyce treatment?

The treatment is suitable for anyone who has unwanted hair in various areas of the face and body. The technology can treat hair colour from golden blonde through to black hair. Your therapist will advise further during a consultation to determine your suitability for treatment.

### What areas can be treated?

3D-Trilogyce can practically be used anywhere there is hair to include; underarms, legs, arms, face, public area, chest, back and buttocks.

### How many treatments are required?

This varies for each client and a treatment program will be devised on consultation. A course of 6-8 treatments is typically recommended.

### How long does treatment take?

The time varies depending on the area being treated but typically range from 15 minutes up to 45 minutes per application.

### How long until I can see results?

Results can be seen from first session and improve throughout the course of treatments.
